INDEPENDENT ASSESSMENT SERVICES

Chartis Medical & Rehabilitation Ltd is one of the UK's leading medical & vocational rehabilitation companies. We operate independently providing service to a range of insurers, solicitors and third party administrators, for injured parties of all ages and all categories of personal injury.

We provide a fast, expert and independent assessment of the rehabilitation needs of injured adults and children.

Our assessment services identify the severity of an injury and the extent of any ongoing symptoms, while considering the level of care needed, following an accident. We assess cases that are at the lesser end of the severity spectrum, such as whiplash injuries, and also assess more serious injuries following catastrophic events

Rapid Telephone Assessment Service

Our **Rapid Telephone Assessment Service** is a fast and effective assessment and is particularly useful for single pathology soft tissue injuries. We quickly identify the severity of the injury and the extent of the ongoing symptoms by assessing the injured party over the telephone.

The report is then sent to the instructing party, along with our recommendations, costs and timescales for further treatment, on the same day as the assessment took place.

Independent Rehabilitation Assessment

Our **Independent Rehabilitation Assessment Service** is an assessment of an individual's **immediate needs**, relating to both single and multiple injuries, including those of a catastrophic nature. It identifies the severity and consequences of the injury and the physical, psychological and vocational impact on their life. The injured person can be assessed in hospital, at a rehabilitation centre, at home or a place of their choice.

A copy of the report, along with the recommendations, costs and timescales for further treatment, is given to the instructing parties.

The Benefits of our Assessment Service

- Assessment of an injured party's current capabilities and the severity, psychological and medical consequences of the injury
- Consideration of the injured party's relevant medical history and treatment, both received and planned
- Recommend future diagnostic and treatment procedures
- Assessment of the impact on the injured party's injuries on their general lifestyle and occupation
- Review of employment history and recovery prospects
- Assessment of injured party's vocational / employment outlook
- Outline of the injured party's medical and vocational needs with associated costs and timescales
- Provides all parties with a detailed and costed rehabilitation plan, in accordance with the Rehabilitation Code

Our Expertise

At Chartis Medical & Rehabilitation Ltd, our assessments are completed by an appointed case manager, who is a registered health care professional.

Referring parties are provided with our service standards prior to referral, which reflect costs, turnaround times and our simple referral procedure.

Our services are delivered within medical confidentiality legislation, the Rehabilitation Code and the Pre-action Protocol.

Following our assessment report, we can manage and implement the agreed medical treatment and vocational plan, should we receive instruction to do so.

Chartis Medical & Rehabilitation Ltd won "Rehabilitation Provider of the Year" in 2006, won "Case Manager of the Year - Highly Commended" in 2007 and won "Case Manager of the Year" in 2008.

Chartis Medical & Rehabilitation Ltd is a founding and corporate member of the Case Management Society of the UK (CMSUK) and is a corporate member of the Vocational Rehabilitation Association (VRA).
